About this piece

Dr. C. Dresser for Coalbrookdale

Two Medieval pattern cast iron garden benches. These particular models are Medieval number 52 in the Coalbrookdale 1875 trade catalogue. I bought them separately, so I am happy to sell them separately.

I can have these professionally bead-blasted to remove the old paint and have them powder-coated for outside use if required. Note: They are easily dismantled and shipped anywhere in the world, where they can then be purpose-made to a length in situ.

Price per item.
