About this piece

An unusual French Mid-Century Modern child's hairdressing barbers armchair

An unusual French Mid-Century Modern chrome adjustable and rotating, child's hairdressing barbers armchair with brushed aluminum footrest and the original blue vinyl upholstery. It would make a very cool desk or work table armchair or even a high chair.

The seat and back adjust up and down and can be locked into place by the turn of a knob when at the chosen height. The lattice-style brushed aluminum footrest also moves up and down and can be locked in place when at the desired height.

A very sturdy, well-designed armchair to help keep a small fidgety child still and at the perfect height. The seat height at the lowest point measures 23.5 inches.

The seat height at the highest point measures 28.5 inches. The top of the backrest height at the highest point is 37 inches. There are three tiny but completely stable nicks to the vinyl on the left side of the backrest shown in the images. The chrome is in wonderful original condition.
